

PD-300

**World's most portable
walk-through metal detector**

PD-300 is the security industry's only foldable walk-through metal detector. In most cases a single person unassisted can transport it with their own car and set it up by themselves within 5 minutes. It's that easy!

PD-300 weighs only 83 lbs and incorporates a patented fold - down design which includes built-in rollers and a 40-hour rechargeable battery.

PD-300 doesn't cost any more than traditional stand-up rigid walk-through metal detectors. It's compact fold-down size eliminates the need to hire electrical contractors to run power cables. PD-300 provides the ultimate in portability while saving customers time & money.

Security personnel worldwide rely on PD-300 portable walk-through metal detectors to prevent concealed dangerous metal objects from entering public venues. And sadly more often today schools & places of worship are also deploying PD-300 for screening concealed metal objects (inc. weapons, vape pens, cell phones, etc.) because PD-300 can easily be removed after a metal screening is completed and avoid risking the stigma of appearing like a dangerous place where metal detectors are traditionally found.

In addition to being portable and highly effective at detecting concealed metal objects, PD-300 is very simple to operate. Its management console is designed for easy menu navigation. Its multiple detection zones have corresponding LEDs which light up when metal is detected in each respective zone. This allows the person operating the PD-300 to quickly locate concealed metal objects on the screened person's body and remove the threat. Additionally, PD-300 has a user-programable sensitivity setting from 1-100. This allows PD-300 operators to target specific types of metal objects for either detection or to be ignored.

FEATURES

- Portable and/or permanent security placement
- 5-minute single person installation time. No tools necessary
- Operates approximately 40 hours on a single charge (rechargeable batteries included)
- Universal power charger (adapter kit available for non-USA receptacles)
- Multiple sensor zones with brilliant LED detection indicators
- Head-to-toe, zone specific detection
- Adjustable sensitivity (1-100)
- Environmentally sealed keypad for programming security settings
- Brilliant LED bar graph indicates detection signal strength
- Memory feature stores settings for multiple operating environments
- Multi-mode traffic counter
- Factory and user definable presets
- Access menus/password protection
- Adjustable volume control
- Dimensions when standing: 88in x 36in x 23in
- Dimensions when folded: 37in x 23in x 26in
- Weight: 83 lbs - can be transported in car or van
- Made in U.S.A patented technology

POP UP SHELTER

A 10ft x 5ft x 5ft shelter is ideal for outdoor use. This lightweight pop up shelter folds compactly for quick and easy transport (optional accessories).
